

Creative Art Workshops for Adults with Intellectual and Developmental Disabilities

This series of interactive art workshops are specifically designed for adults with Intellectual & Developmental Disabilities (IDD) who have transitioned out of the school system. We understand the limited opportunities for engaging activities for adults over 21 and aim to provide enriching creative experiences through art, wellness, and horticulture for these individuals.

Classes are held onsite at GFS and include a guided tour, art project, and wellness activity. Every session features a different art project, browse our web calendar to sign up!

Creative Art Workshops for Adults at Grounds For Sculpture are supported, in part, by the Joshua Harr Shane Foundation.
